Notes

Shelby American Vehicle Identification Number (VIN)

The Shelby VIN column represents the stamped (or, [engraved](#), in the case of some very early cars) serial number (VIN) plate. From what we've discovered,

Components

Base	Neither air-conditioning nor California Emissions
AC	Air-conditioning ("Select-Aire")
EECS	Exhaust Emissions Control System / California compliant emissions ("Thermactor")
AC+EEC	Both Air-conditioning and Exhaust Emissions Control System
Paxton	Supercharger (added by Shelby American @ LAX)
Paxton(E)	Believed to be a supercharged engineering car (undocumented)
427-4V	427-4V Lightweight engine swapped by Shelby American @ LAX

Radio

Not all '67 Shelby G.T. cars were factory-equipped with an AM pushbutton radio. Possible values for this column:

(none)	The car did not receive a radio and left LAX with a block-off plate
AM	The car received an AM radio at Ford's San Jose plant, or one was added by Shelby at LAX prior to shipping to the dealer
FM+	AM/FM (mono) radio added by Shelby at LAX
?	We don't know if the car left LAX with a radio or not (because we haven't audited the car's factory paperwork)

Note: The only authoritative way to know whether a car had a radio or not, would be to obtain the car's Shelby factory paperwork (Production Order and/or
